

Login.gov

Program Roadmap (Interim)

What is Login.gov?

Login.gov enables members of the public to create a single digital account that provides access to their benefits and services at over 50 federal and state agencies.

This “one account for government” is a key piece of national infrastructure – providing a secure, resilient platform that enables a seamless user experience while combating emerging security threats.

Key Benefits

-  Saves users time and protects them from identity theft
-  Reduces costs, complexity, and fraud risks for agencies
-  Ensures consistent cross-agency security and anti-fraud practices
-  Creates government-wide efficiencies and saves taxpayer dollars

Login.gov's North Star

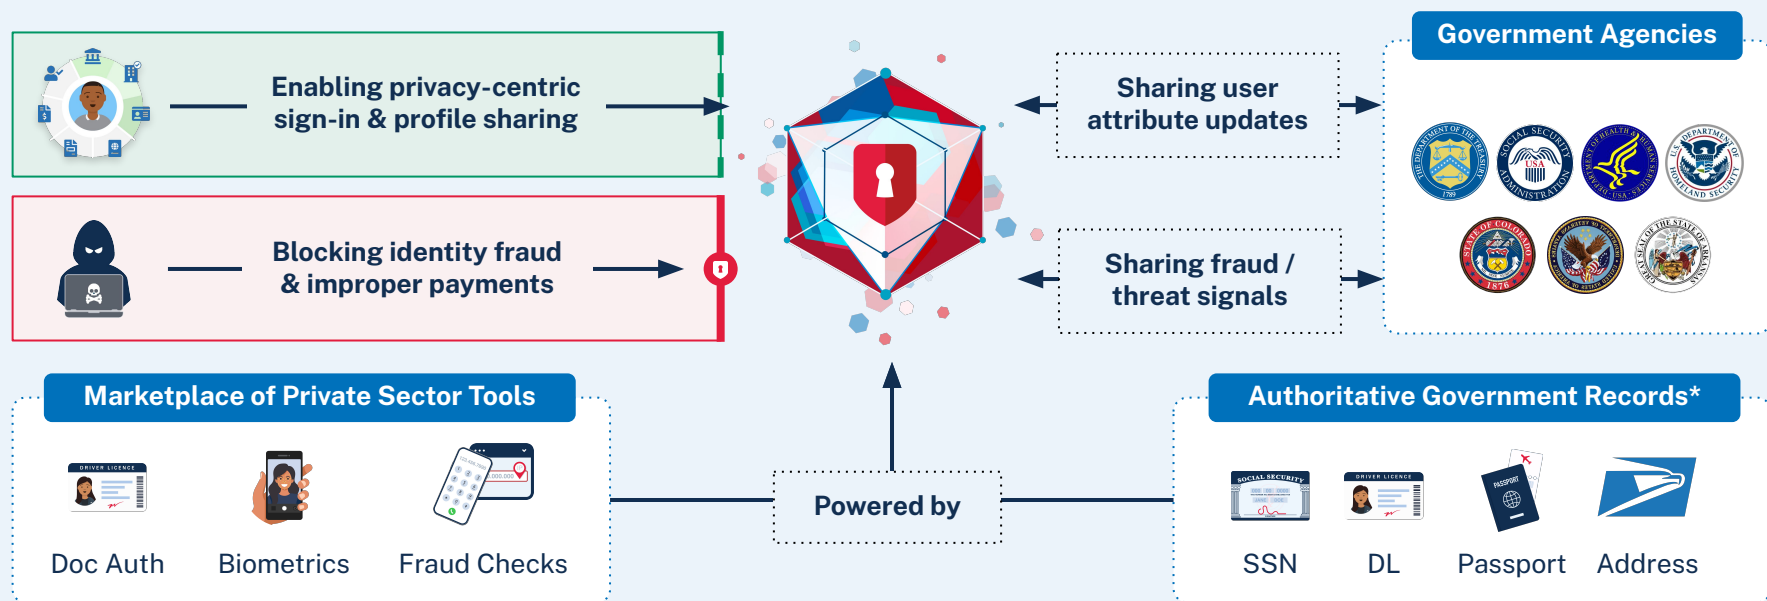

Every member of the public can use their trusted Login.gov account to access all of their online government services.

Improving Access and Reducing Fraud

By bringing together the best of public and private sector

Government-wide Identity Platform

Saves people time | Saves taxpayer dollars

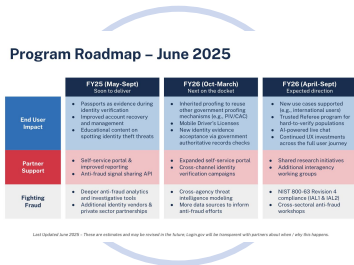

*Includes current and planned

About this Artifact

Transparency is a guiding principle for Login.gov, which can be seen in the many ways in which we work alongside our partners and the public to promote collaboration and accountability.

Plans

(e.g., program roadmap, partner webinars)

Policies

(e.g., privacy impact assessment, FedRAMP)

Code

(e.g., open-source code, developer documents)

Collaboration

(e.g., partner / industry working groups)

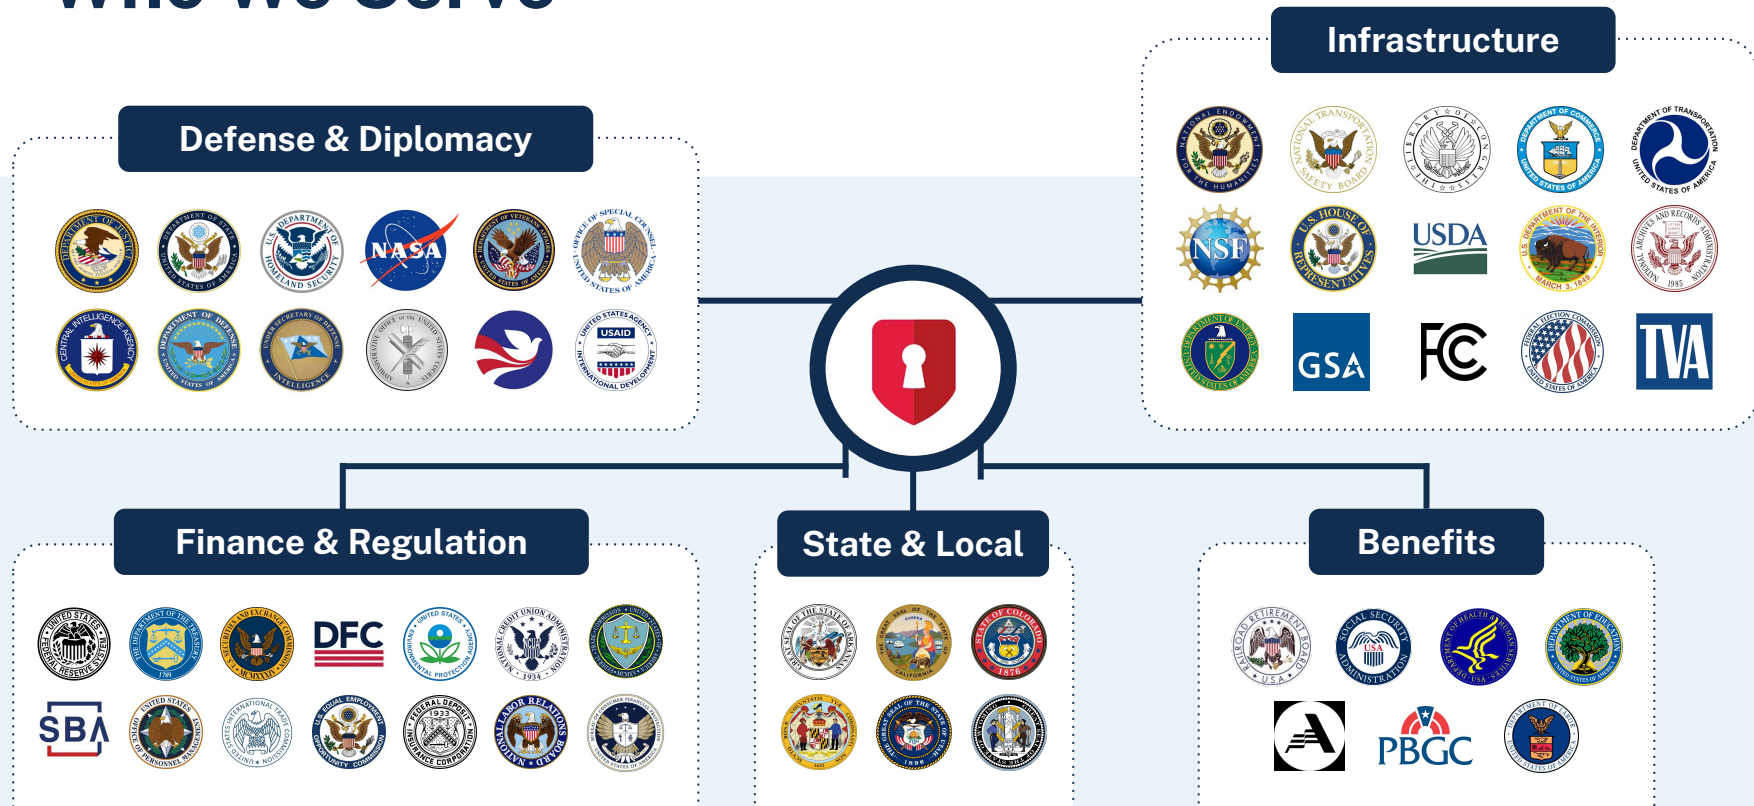

The content presented in the Login.gov Program Roadmap is forward-looking and intended for informational purposes only. GSA is shifting the publication cycle to match the Government fiscal year and will publish a new version in October. This interim version is current as of August 2026. [View the December 2025 roadmap.](#)

Program Roadmap – August 2026

	Recently Launched	Working On Now	Expected in 2027
End User Impact	• Mobile driver's licenses • Passport cards as evidence • Reduced friction in the identity verification process • Workflow for users to merge duplicate accounts	• A redesigned user interface • Ability to reuse existing identity credentials (e.g., PIV) • Streamlined account setup and recovery processes • Limited roll-out of a new in-person proofing workflow	• Proofing support for international users & minors • Alternative pathways for hard-to-verify populations • AI-assisted user support • Continued UX investments across the full user journey
Partner Support	• Significantly lower prices • New partner portal & self-service reports • State partner working group	• New data sources and visualizations in the portal • Improved partner help center	• Cross-agency UX working group with shared research • Streamlined process for launching new applications
Fighting Fraud	• Deeper anti-fraud analytics and investigative tools • Additional fraud checks at key points in the life cycle	• NIST 800-63 Revision 4 certification (IAL1 & IAL2) • Improved case management tooling and workflows	• Cross-sector anti-fraud forums & collaboration • Additional tooling & orchestration capabilities

Who We Serve

180+ million user accounts | 500+ million sign-ins annually | 700+ live sites and services | 54 agencies and states

We Value Your Feedback

We update and re-share this artifact regularly, and use your feedback to adapt our plans.

Please let us know:

- Use cases that you would like us to support
- New capabilities to improve service delivery
- Ways in which we can improve collaboration
